Input Functions

Task 2: Adding Two Numbers

Question:

Write a program that asks for two numbers, adds them, and prints the result.

Input Format:

- Two lines of input, each containing a number.

Output Format:

- The sum of the two numbers.

Example:

Input:

3

5

Output:

8

Explanation:

- The inputs 3 and 5 are converted to integers and then added together to produce 8.
